

cut Resistant WristGuards

Catlog Number **Length/cm**
0601 **16.5**

Can be used under normal climatic conditions.

Wristguards should be replaced when they have become damaged. Store in original packaging. Can be used up to 5 years after date of manufacture if stored correctly. Items should be stored away from direct sunlight to maintain the optimum properties of the garment.

Items shall be wrapped and bundled in polymeric packaging. Each packet shall be labelled/contain information concerning size, type, quantity, distributor, the CE mark. This information is provided in each packet.

Wristguards are made to one for each length. Protection levels are uniform all over the wristguard.

Test :	Performance Level
	A
Abrasion Resistance:	3 EN 388:2003
Blade Cut Resistance:	5 EN 388:2003
Tear Resistance:	4 EN 388:2003
Puncture Resistance	4 EN 388:2003

This series satisfies the basic requirements of the PPE Directive in being innocuous/free from nuisance factors, ergonomic, breathable. Conditions of use are not simulated by the test results and as such service life cannot be specified. Results should be used for guidance in initial selection.

Informative:

Wristguards should not be worn when there is a risk of entanglement by moving parts of machines. Inspect regularly for obvious signs of damage. Do not use if the item shows signs of cuts, perforations or other serious mechanical damage. Items should be replaced if the outer layers have become so damaged that the inner becomes visible.

WARNING:

This series satisfies the basic requirements of the PPE directive, being innocuous / free from nuisance factors, ergonomic, and breathable. Conditions of use are not simulated by the test results and as such service life cannot be specified. Results should be used for guidance in initial selection.

The EC type examination was carried out by SGS United Kingdom, Weston-super-Mare, BS22 6WA.(Notified Body No: 0120).
